Jerry Shum

Toronto, ON | j.shum@outlook.com | linkedin.com/in/jerry-shum/ | github.com/JerryShum

Summary

Technology professional with hands-on QA experience: built automated regression tests in ServiceNow's ATF (raising coverage 50%), validated REST API integrations with Postman, and tracked defects in JIRA across production systems. Looking to bring that testing discipline to a dedicated QA role.

Education

Ontario Tech University — **Oshawa, ON**
Bachelor of Engineering in Software Engineering (Hons.) — *Sep. 2021 – June 2026*

Awards & Achievements

3rd Place (Programming) | Ontario Engineering Competition (OEC) — **Jan. 2025**
1st Place Overall | NASA Space Apps Challenge - Oshawa — **Oct. 2024**
1st Place (Programming & Consulting) | Ontario Tech IEC — **2023 – 2024**

Experience

Celestica — **Toronto, ON**
Information Security Specialist — *May 2026 – Present*

- Developed **Python** automations on **GCP**, including a reconciliation job that validates **ThreatLocker** and **ServiceNow** records for data consistency across both platforms.
- Administered **ThreatLocker** application allowlisting across 40+ global sites, processing application requests, writing allowlist policies, and moving machines from Learning to Secured mode.
- Contained compromised hosts and tuned exclusions and prevention policies in **CrowdStrike Falcon** across the global endpoint fleet to reduce false positives without weakening protection.
- Analyzed reported emails for phishing indicators using **Check Point Harmony Email (Avanan)**.

IT Application Developer — *May 2024 – Aug. 2025*

- Built and shipped internal **ServiceNow & JavaScript applications** automating manual workflows, saving 50+ employees 5 hours each per week (**250+ hours weekly**).
- Coordinated **UAT cycles** for ServiceNow application releases, designing test suites of **10–30 cases per cycle** and documenting results via Excel and ServiceNow tickets.
- Wrote automated **functional and regression tests** in ServiceNow's **Automated Test Framework (ATF)**, raising test coverage by 50% and catching critical regressions before production deployments.
- Partnered with the **CRM team** on **Dynamics 365** tickets, identifying and resolving system and data discrepancies to maintain data accuracy across platforms.

Arkhet AI Inc. — **Remote**
Software Developer (Part-Time) — *Feb. 2025 – Apr. 2025*

- Contributed to the V1 **frontend** using **React and ShadCN**, shipping a polished UI ahead of the beta launch.
- Designed type-safe **REST APIs** and middleware with **Hono** on edge-compatible runtimes to minimize latency.
- Wrote unit and integration tests (**Vitest**) for React components and Hono API endpoints, validating functionality and catching regressions.

Magnify Access — **Toronto, ON**
Frontend Developer — *Jan. 2024 – May 2024*

- Conducted accessibility testing via **Lighthouse** audits, verifying **WCAG 2.1** compliance (ARIA labels, keyboard navigation) across interfaces.
- Optimized SEO and frontend performance, driving a **20% increase** in organic web traffic.

Projects

Story Weaver | *Bun, TypeScript, React, Hono, PostgreSQL, GCP* — **Source Code**

- Architected a monorepo featuring a node-based visual editor (**React Flow**) for dynamic video generation.
- Integrated **Google GenAI** and backend **FFmpeg** processes for automated multimedia manipulation and scaling via **Google Cloud Storage** (GCS).

Technical Stack

QA/Testing: ServiceNow ATF, UAT Coordination & Test Case Design, Vitest, Postman (API testing), JIRA (defect tracking), Lighthouse (accessibility audits), functional & regression testing
CRM/Business Platforms: Dynamics 365, ServiceNow
Languages/Frameworks: Python, TypeScript, JavaScript (ES6+), SQL, React, Hono, TailwindCSS
Security: CrowdStrike Falcon, ThreatLocker, Check Point Harmony Email (Avanan)
Tools/Cloud: GCP, Bun, PostgreSQL, Supabase, Docker, FFmpeg, Git, GitHub Actions
